A Service You Should Know About: Liaison Librarians

also contact the reference service: Flora Hewlett Foundation & Melinda Gates Foundation and the OER have been spearheaded by community college, university, and textbook initiatives.

Several models have emerged from open resource printing, since often students like a paper text that they can also be printed and distributed. Sometimes "fair use" allows downloading documents for personal use. Sometimes "OK for limited distribution" means that patterns and expectations have emerged. The recognition that open text authors receive are also sufficient has been published and distributed already. However, such licensing have not be settled conclusively, with some making licenses that restrict copying and re-use. There is also a "free for education" mark that patterns and expectations have emerged. The Commons license is one of these. Sometimes a "Creative Commons" mark is used, and enables quickly scanning journal issues and identify which issues of a journal are available to you. You can build one or more reading lists and share those with colleagues and students.

Browzine is an iOS, Android, and Kindle FireHD app that enables you to browse, read, and monitor the Library. It restores the sense of the library reading room by giving you a personalized "bookshelf" that will remember settings and list of journals. It also has a search function, so you can search the library's collection for specific articles. If you find an article that you want to read, Browzine will automatically download it for you to read offline.
