Coronavirus Update 11-9-21

Dear members of the Sacred Heart University community,

We are pleased to tell you that Hartford HealthCare is able to offer an additional clinic for booster shots on Friday (November 12). The clinic will take place from 10 a.m. to 2 p.m. by appointment only. [Please register](#) if you plan to attend. There will be 100 slots available, and when they are full, the link will stop working. This clinic is for SHU students, faculty and staff only. Both Pfizer and Moderna boosters will be available. Please bring your vaccine card and another form of identification.

To be eligible for the booster, you must be at least six months past your second dose. If you are immunocompromised, you can receive a booster after only 28 days from your second dose. If you do not meet the criteria for a booster, you will not receive the shot.

We are working on adding an additional clinic this month along with the two already scheduled for December.

If you are looking for a booster and cannot come to the SHU clinic, we recommend calling [Walgreens](#) or [CVS](#) to make an appointment.

Pre-holiday Testing

We are offering the opportunity to be tested for those who want to ensure they are negative before traveling home. Testing hours will be extended next week so that everyone who would like to can be tested. Pre-holiday testing will be available from 8:45 a.m. to 2 p.m. on Monday and Tuesday at the library and from 8:45 a.m. to 2 p.m. on Wednesday and Thursday at the Edgerton. There will not be any testing Thanksgiving week, so take advantage of these extended sessions if you want a pre-holiday test.

Thank you,
The Coronavirus Planning Team

--

Please note: Given the unpredictability of the variants, we will continue to consult with and follow the guidance of the CDC, the Connecticut Department of Health and state and local health officials. We will all need to be flexible and understand that as we continue to work in the best interest of the University community, there will likely be changes and updates. We also suggest that all students have plans in place should there be a need to return home for isolation, quarantining, etc.
