Student Government addresses students

By Andy Madison

In an unprecedented move until the day it happened, Student Government President A.J. Ciesielski and fifteen of seventeen members of Student Government spent their convocation hour last Thursday addressing the concerns of students in a question-answer session and an attempt by Student Government to become more visible to their peers.

Ciesielski states "it was a very good idea. This was the fulfillment of a campaign promise I had made. The purpose was to get direct student feedback on any promise or concern."

The questions ranged from security concerns to the involvement in activities by students at Taft Commons to questions directed to class presidents as to what they were doing for their respective class.

Senior class president Al Paolozzi brought up the numerous fundraisers which have taken place and addressed Senior Week involvement for underclassmen with the reminder "a student does not have to be a senior to attend most senior week events. The

exemption being the Senior Cruise."

Ciesielski informed the students on the security issue of a letter he had submitted to administration inquiring about the lack of security and other security matters. After numerous automobile break-ins, administration saw fit to focus their security needs at prime hours from four to twelve midnight.

"As for Taft Commons student involvement, Student Government has extended a hand to these students for every event," Ciesielski noted. "Student Government Vice-President George Reyes-Gavilan and I even went door to door to inform students of upcoming events. But it appears students are pretty much set in their ways."

Ciesielski continues, "overall, I was disappointed with student response, if there were any problems, this was a chance to speak. I hope in future forums there will be more student impact so the entire Student Government could hear what the students think and be able to respond to it."

Student response was not very strong as indicated by the numerous times during the forty five minute session that Ciesielski

President of Student Government, A.J. Ciesielski, addresses students in the SHU cafeteria on Thursday. Students were asked to voice their questions and concerns during the session with the student government.

Photo by Michael Champagne

walked into the crowd and solicited questions.

Junior, Sheryl Novak commented, "I thought it was really a good idea. I know who my representatives are there for. I did not ask a question at this time. However, it was a good idea to open up to students and meet them face to face."

Ed Meese spoke to a full-house in the Schine Auditorium on Thursday, Nov. 8. After the lecture on the Bill of Rights he opened up the floor to questions on his interpretation of issues.

Meese advocates states' rights

By Shellie Dagoo

The abortion issue should be decided by state legislatures, former Attorney General Edwin Meese told an audience of about 200 people in the Schine Auditorium Thursday night.

"The ordinary conduct of day to day life should be left to states," Meese said. "States don't have to all do the same things."

"The founding fathers said states are the laboratories of government," Meese said. "If states wanted to experiment with differences in the law then we wouldn't have the (national) disaster that would occur if anything went wrong."

"This is the genius of the Constitution rather than a defect," Meese said.

He said the 1973 abortion case, Roe versus Wade was thought by most legal scholars to be a wrong decision, even those who agreed with its results.

The Supreme Court violated the basic balance of power between the state and federal government, Meese said. It took a legislative

decision and made it a Constitutional decision.

"It raised the (abortion) issue to a national standard," he continued.

Had the courts left the decision to the states, he said, those who felt abortion regulations should be loosened would have done so through state legislatures.

The 1953 Yale University graduate advocates a policy of original intent, a conservative interpretation of the Bill of Rights.

If the court had followed the policy of original intent, the 1973

NEWS BRIEFS

Continuing Education offers grants

The Lecture Committee of the Continuing Education Council has money available to faculty members of SHU to help them underwrite the costs of sponsoring lectures or special events for students. The criteria is as follows:

- The scheduled time of the event or special event must coincide with the part-time student's ability to attend;

- The CEC must be listed as a co-sponsor of the event.

Due to the lack of response in the past for sponsored grants, the Lecture Committee has established an additional fund to help faculty send students to off-campus lectures or conferences.

Any faculty member interested in applying for either kind of grant should send a *brief*, written request to Continuing Education Council's Lecture Committee. All requests should specify the topic of the event, name of speaker, proposed date, time and place of lecture.

Prince to visit gallery

Renowned folk art collector Daniel C. Prince will exhibit "Flights of Fancy: Birds in 20th Century American Folk Art" in the Charles Plohn Gallery Sunday, December 2-24. The exhibit features works by predominately contemporary folk artists in all media.

On Sunday, December 4, Prince will present the lecture "Introduction to American Folk Art" in the Faculty Lounge at 7 p.m. A reception will follow in the Plohn Gallery.

Admission is free and both are open to the public.

Polish Week continues

Polish Week, a celebration of ethnic culture, sponsored by Sacred Heart University's Ethnic Studies Center and the Polish Club, in conjunction with other community groups, will continue till November 17 with a musicale at 7:30 p.m. in Room A of the SHU Academic Center. Internationally acclaimed pianist Andrzej Anweiler and four award-winning Polish musicians, now attending the Yale School of Music, will play the works of Polish composers, including selections from Chopin and Paderewski.

Last Chance for help

Workshop Skills Center presents the last of the workshops for the month of November.

Writing An Effective Argumentative Essay

Today at 11:00 a.m.

The aim of this workshop is to show students how the use of an issue oriented topic, a clearly stated thesis and sound logical support can result in an effective persuasive/argumentative essay.

Writing Effective Sentences and Paragraphs

Wednesday, November 15 at 11:00 a.m.

This workshop will review writing effective sentences and will concentrate on developing a paragraph. Focus will be primarily on the topic sentence and development.

Editing and Revising Your Papers

Monday, November 19 at 11:00 a.m.

Tuesday, November 20 at 11:00 a.m.

Do you know how to take your essays through several drafts to perfect your prose? If not, this workshop will be useful to you as it teaches you various editing skills that help you to reorganize your paragraphs, to tighten your sentences, and to clarify your ideas to make yours a more effective piece of writing.

Check it out

The Health Services office will be holding blood pressure screenings for anyone interested, at the Health Services office next to the cafe on the following dates:

November 20

December 11, 12 & 13

All screenings will be held from 11:00 a.m. to 1:00 p.m.

For more information, please call 371-7838.

Attention all media majors

There will be a meeting of all students who are media studies majors or who are interested in taking future courses in media studies on Tuesday, November 20 at 5:30 p.m. in the media studies studio in the administration building.

Tom Powers and Rebecca Abbott will be available to answer students' questions about requirements for the major, to describe courses that will be offered in the spring semester and to learn from you what your particular interest in the media studies program is and how the instructors can offer more of what you want to learn.

Says Abbott, "Please come and let us know your views and meet new members of the media studies program."

Refreshments will be served.

Ellis Island trip

The Honors Program is sponsoring a trip to Ellis Island on Friday, November 3 at 8:30 a.m. and will leave the island at 3:00 p.m.

The bus fare will be free but there will be a \$5 fee for the ferry ride. Because of a limited number of seats on the bus, only the first reservations can be accepted. Lunch is not included.

Oh La La, La Hispanidad

The La Hispanidad Club is sponsoring their first fashion show on Thursday, November 29 at 7:00 p.m. in the SHU Theatre. The ticket price is \$3 which includes admission to the reception after the show in the Hawley Lounge.

The fashion show will feature students, faculty and staff modeling clothes from ATTIVO, a clothing store located in the Trumbull Shopping Park. Anyone attending the show will be able to receive a 10% discount on any item at ATTIVO.

For more information, please call 371-7728.

Smile

The *Prologue* yearbook says it's senior portrait time! The photographer, T.D. Brown, will be on campus November 26, 27 and 28 from 9:30 a.m. to 3:00 p.m. in Chubby's Lounge. There is a \$10 sitting fee.

Seniors must schedule an appointment at the sign-up table in front of the cafe from November 12-20.

The meeting place

Students and staff congregate in this south-wing hallway after a class to compare notes and hang out.

Meese advocates conservatism

cont. from pg. 1

abortion case would have been a matter of two sides working to persuade state legislators, Meese said.

"The only way to ensure rights is by maintaining a faithful interpretation of the Constitution, the ultimate source of those rights," Meese concluded.

"What bothers me about a loose interpretation of the Constitution is that judges can give rights and judges can take away rights," Meese said. "The rights of women and minorities have been enhanced by a faithful interpretation of the Constitution."

Had there been a strict interpretation of the Constitution, there never would have been a doctrine of separate but equal, which had to be corrected by Brown versus Board of Education, Meese said.

"The job of the judges is to interpret the Constitution, not to add to it, or apply it in a statutory sense,"

Meese said. "The bottom of the concerns of the founders was that power ultimately comes from the people.

"If the judiciary tries to substitute their judgment then you have unelected people doing this job," Meese said.

"The court has been wrong...in stretching the power of the federal government to the exclusion of states," Meese said. "That's why the national government has been so taken up with so many local issues."

There hasn't been an adequate dividing line between federal and local authority, he continued.

Congress is constantly expanding its power, he said. The states cannot appeal to the federal government to protect their rights because that's like Colonel Sanders protecting the rights of the chickens, Meese said.

The Supreme Court is the Constitution, said John Kikoski, professor of political science.

"Politics drive law," Kikoski

said. "The court is a political institution."

The policy of original intent does not do much to expand liberty, Kikoski said.

"Ronald Reagan said, 'Let's not forget that we are a nation of states,'" Kikoski said. "But the interpretation of freedom should not vary from state to state."

Although I am in favor of state rights in certain economic areas, a national standard of justice must be maintained."

"I don't want to cross state lines from Connecticut to New York and find out that my rights to free speech and privacy differs," Kikoski said.

Meese's speech kicked off the Freedom Institute's bicentennial celebration of the Bill of Rights.

Meese is a Ronald Reagan fellow at the Heritage Foundation, a Washington-based organization established to carry on the former president's policies of states rights, deregulation and low taxes.

Scholar edits book for publication

By Cynthia Lagaris
Staff Writer

Sid Gottlieb, Ph.D., a man constantly contributing to the intellectual development of others, has recently edited a book titled *Approaches to teaching the Metaphysical Poets* published by the Modern Language Association.

The Bridgeport Post recently praised Gottlieb for his energetic personality that has inspired so many to learn. The article compares Gottlieb to John Keating portrayed by Robin Williams in the 1989 hit movie *Dead Poets Society*.

Gottlieb, a professor of English and media studies at Sacred Heart

University for the past 15 years, is well-liked and respected by both colleagues and students. "He makes learning fun and has made a real difference in my life," says Liz DeMoura, a media studies major.

Approaches to Teaching the Metaphysical Poets, the 28th edition in a series of well-received instructional books, is designed to aid undergraduate professors teaching 17th century poets. The book contains essays that describe strategies and procedures for learning.

In addition to editing the contents of the book Gottlieb also wrote a detailed introduction which covers the background information on metaphysical poets.

"This book is important to me because it allows me to assist others in my primary life interest which is teaching," says Gottlieb.

Gottlieb also receives high recognition from fellow colleagues. "To put together a collection of essays, write a scholarly introduction, and to have the book published by the prestigious Modern Language Association is a great achievement," says Dr. Ralph Corrigan, English professor at Sacred Heart. "We are lucky to have Sid, a scholar with a national reputation, on our faculty," he added.

There will be a book party to celebrate the publication of Gottlieb's new work on Nov. 20 from 3:30 to 4:30 p.m. in the Faculty Lounge.

Dr. Sidney P. Gottlieb

Seven week courses offer choice

By Jennifer Barbin
Staff Writer

While most students are driven by thoughts of winter break during midterms, others have already completed one of their classes. These students are enrolled in seven week courses at Sacred Heart University.

A total of 229 students are enrolled in 12 of this fall's seven week offerings. Enrollment is highest in Business: Nature and Environment with 30 students, Business Ethics with 28, and Basic Astronomy with 27.

"I think you have to have all kinds of formats," says Douglas Bohn, registrar. "We're looking for balance." Bohn explains that many

other colleges provide a variety of choices for their students.

"It was an idea that was tossed around" and "came out of the Academic Affairs area," says Bohn who wants to offer "an alternative" for Sacred Heart students as well.

Seven week courses were first offered at SHU in the fall of 1988. The format is more flexible and convenient for students with busy schedules who would like to complete two sequential courses in one semester instead of finishing them in one year or two 14 week semesters. This can speed up the process towards graduation or allow students to work at seasonal jobs.

In the past, the most popular

classes have been Principles of Economics 1 and 2 and Introduction to Environmental Chemistry. The highest number of seven week courses is being run this semester, and student enrollment in this fall's offerings is the highest since the spring of 1989.

Students and professors see advantages to these seven week courses. Clayton Boras took an introduction to chemistry course. "I wasn't a chemistry major," says the finance student, "so I figured the quicker to get it over with the better." Others take the seven week courses so that they will not have to juggle as many assignments when it's over, enabling them to concentrate on the rest of their classes.

Business Professor Saul Haffner likes the format because it allows him to teach two related classes as a module. "I could bridge the two courses to maintain continuity," says Haffner.

"There are some courses that don't fit the format," says Bohn. Classes with specific goals and narrow focuses are favored over courses covering a broad range of material by some instructors.

You simply cannot change a 14 week course into a seven week course "by taking away" says Dr. Marian Calabrese, director of freshman communications. A course must be defined and assigned according to a seven week format initially "in order to

be pedagogically sound."

A seven week course is a "whole course at double speed," says Thomas Powers, media studies professor. Courses, he and others point out, which require long term projects or term papers are problematic because of the time constraints.

Dr. Angela DiPace Fritz, chair of communications, explains that classes "where you need processes, drafts, revisions" are not very suitable because it takes time to apply what is learned. Management Professor, Douglas Campbell sees that some courses in economics, statistics, or finance would be difficult to fit into the format because of time consuming work with facts and figures.

"Please, allow me to introduce myself"

Student government has been working hard this year to plan events that would be entertaining to everyone. They have done exceptionally well in bringing interesting activities to SHU. Unfortunately, involvement has not been as great as it could have been at several activities and in freshman elections thus far.

Is this the fault of the students? Has student government been as enterprising as possible to attract students? Quite possibly, invisibility may have something to do with it all.

In an attempt to decipher what exactly we, as students think, student government came to a sudden decision this week to approach us (well, at least those present in the cafeteria) with a forum-type assembly.

Whether SG feels accomplishment from their effort, it makes us wonder how informative or successful such an endeavor could be.

Three weeks short of a whole semester seems to be a little late to be interested in the governed body. Such an event would have been far more appropriate and worthwhile had it happened in the beginning of the semester.

The purpose of a government of this type is to keep students interested in and informed about their University and be known and visible to all of their constituents.

After interest has run decidedly low throughout the student body, it is much more difficult to regain. Being such a high-profile subject as it has been in the past, SG should have worked much harder in lobbying the students to get involved. The only lobbying we've come to expect happens during elections.

Perhaps it is too late to resurrect our interest now, but next semester means new beginnings. Hopefully, planning and organization will be a little more efficient than what we've experienced this fall.

Hauntings

By Jason McLeod

Deep within the dark confines of the Occult Museum which lies adjacent to the Warren home, a soft red light provides the only illumination in this gathering place of artifacts and relics. It is a fairly large room, completely filled with statueary, books, paintings, idols, daggers, a real Vampire's coffin, amulets, and scores of other fascinating articles which each have a different tale to tell.

The night was spent reviewing the most recent cases. The case I was involved in was in New Hartford, CT. We reported hearing footsteps, seeing two intense ghost lights (the visible energy given off by a spirit), and picking up heart beats on each of the three video cassettes.

It is a cool rainy night, as a dozen figures emerge from the Warren School of Paranormalogy, into the soft rain. The four hour

seminar is at its close, and for eight of us, the night is far from over. Within minutes we were on our way to a duplex home in Derby, CT, where the present owners complain about various disturbances.

The "Scream Team" for the evening consisted of John, the leader of the investigation, Andy, a well developed psychic, with Clairvoyant powers, Ecto-Joe, a physical medium, who acts as an energy pack for non corporeal entities which draw his energy, and when visible to the clairvoyant eye, a thick white ectoplasm forms all around him. Joe's wife, two new students, Lou (my friend and medic) as well as myself.

When we arrived Andy and John were already present. Andy said "It's very strong guys, make sure you white light yourselves before you go in." Andy refers to the Christ-light: a protective aura which surrounds every one. We went in and positioned ourselves within the duplex. Andy and John immediately went to the attic, and we all experienced bangings, and small noises until we left at around 3:30 a.m.

The second night however proved to be quite different. It was a night of waiting, watching, and feeling. Andy is the highlight of the team, when Lorraine is not around of course, Lorraine being much more advanced physically than Andy or Joe. It was a constant "It's in here," and "There it is."

The highlight of the evening was the living room of the left side of the duplex. Four of us were waiting in the dark, as Andy spotted black forms whisking about in the kitchen, and throughout the

room. Andy being so developed, has a tendency to let go, and allow the entity to draw too much energy, which can bring him into a transe, and under possession which is very dangerous. When it was present in the room, I removed blessed Rosary Beads from my pocket and held them in my hand. Almost immediately Andy asked what I was doing, because he saw a black, man-shaped form whisk right over and face me. Joe said that I had Rosary Beads and Andy told me to put them away quickly. I did, and it went to the stairs and waited there, and then back to Andy, and attacked him. Andy as well as any psychic will feel a pressure on his temples, and ears. Andy said "Back Off!" and with the assistance of Joe, who prayed for him, and added his aura to Andy's, the attack ceased. At the same time the Rosary Bead incident occurred, Lou saw the cellar door open and close several times in the adjacent Duplex.

That was enough for me, as Andy showed me exactly the positioning of the spirit, as it moved throughout the room. It's a good thing that I couldn't see it, because I would have probably raised the beads as protection and found myself under attack. You see, we weren't supposed to provoke it, and I unwillingly began to. What the diabolical spirit would have done if I held the beads for any longer period of time is up to the imagination, but do we really want to know?

If there are any questions, and if anyone is interested in attending a seminar, let me know, or drop a line to the *Spectrum* office.

WRITER'S BLOCK

On the legalization of drugs

The U.S. government has possible plans in the works to pay Bolivian coca farmers subsidies to eliminate coca plants and grow other crops. The leaves of the coca plant are used to make cocaine. The rationale is that if the plants aren't grown, there will be no final product.

It makes sense that with no product to distribute, the drug problem would be eliminated. But there are flaws in this line of logic—all of them major.

First: If we pay Bolivian farmers to not grow coca plants, which are abundant and one of few sources of income in their country, what's to prevent the purchasers of the coca leaves from paying more for the continued production of said leaves? We would find ourselves in a bidding war—one we could not win since there is a tremendous amount of money to be made from drugs.

Besides, with the current shambles our economy is in, where would the funding for such an effort be found? The American taxpayer is already financing the current War on Drugs, the Savings and Loan Crisis, the Crisis in the Gulf, environmental crises nationwide, and a host of other problems at a time when our economy is experiencing a general slowing trend. It would not take one growing season for the farmers to appreciate the beauty of our capitalist system and grow for who ever pays more money.

Second: Not growing coca plants does not eliminate the means of production. Cocaine is the net result of "playing" with a natural resource. Just as LSD (lysergic acid diethylamide) is the laboratory created hallucinogen which produces basically the same results as the naturally occurring psychoactive substance, psilocybin, in "magic mushrooms", procaine is the laboratory creation of the (almost naturally) occurring cocaine. If the natural resource is inaccessible, it's no big deal to replace it with a nearly identical laboratory creation. In fact, the lab can probably produce a vastly superior product by tweaking the recipe here and there.

Third: Coca plants can be grown almost anywhere, but the climate of most South American regions is ideally suited for such a crop. If we paid off one country, another would take up the slack, and so on. We would always be one step behind the drug lords even if we could afford to play this game of international leap-frog. But, since the drug problem is not uni-dimensional, we still have opiates, heroin and marijuana, among others, to chase off the planet.

Fourth: A majority of arrests and cases appearing in court are for mere possession and sale of drugs. Our courts and prisons are overflowing with people who need drug treatment, not incarceration. By legalizing drugs we offer these people more of a chance to rehabilitate themselves through programs that demand specialized medical and psychological treatment.

Additionally, prisons are not self-supporting. The maintenance of the prisons and the prisoners is also supported with tax-payer's dollars, further limiting the number of dollars we can spend in South American countries.

The logical situation is the

legalization of drugs. Just as the outlawing of alcohol in 1918 did not stop the demand for it, neither shall the continued criminalization of drugs solve this problem.

With a legalized system of drug distribution (i.e. through pharmacies and drug-stores), there would be the possibility of quality control, currently unheard of in the drug world. Also, legalizing drugs takes away much of the profit as it is no longer a black-market

trade. A side effect would be a reduction in crimes committed to pay for cocaine, crack and other drugs.

The revenue raised from taxes on this new legal commodity could be put toward education against substance abuse and digging this country out of the financial straits it is presently mired in.

Of course, as is the case with alcohol and tobacco, age restrictions would be imposed on buyers to keep the youth from easy access to the drugs. Additionally, setting legal intoxication limits and guidelines about the public use of

drugs (such as those in place with alcohol use) can be imposed. People violating these limitations could be remanded for treatment or prosecution.

The War on Drugs failed and now we find ourselves trying to bail water out of a sinking ship.

Decriminalization is the only answer.

Editor's Note: This column was written prior to the resignation of William Bennett, the Bush appointed drug-czar in this country's War on Drugs, not in response to that resignation.

November 1990

Dear Sacred Heart Students,

"You can't satisfy all of the people all of the time".

Stanley H. Kaplan prepares more than 90,000 students annually for a full array of standardized tests (i.e. LSAT, GMAT, GRE, MCAT, SAT). More than half of all students applying to law school this year will have prepared for the LSAT with Kaplan. Our course has produced more LSAT scores over 40 than any other program. Over 60% of students entering medical school prepared for the MCAT with Kaplan. These attendance statistics dwarf all the collective efforts of our competitors.

Your local Kaplan Center offers courses throughout Fairfield and New Haven Counties helping more than 1400 students annually. It is unfortunate that our first dissatisfied customer was a local student.... perhaps he was the exception that validates our success.

SEE FOR YOURSELF! Visit our center and take a FREE diagnostic exam providing you with a computer assessment of your strengths and weaknesses as you prepare for the LSAT, MCAT, GMAT or GRE.

Present this letter at Kaplan's New Haven Center for a \$100 discount on any Kaplan course. We're ready to help you prepare for the next LSAT (the last of the old format), MCAT (new exam), GMAT and GRE.

Looking Forward to
Meeting You,

KAPLAN OF CONNECTICUT

CALL 789-1169

Long, lean and a real nice guy

By Sylvia Bennett

Those who know him agree that he's a great guy. Others who may not know him have surely seen him on campus. His height separates him from those around him.

Between meetings, daily tasks and seeing students, everyday is a busy one for Alvin Clinkscales, the special assistant to the Provost for Community/Minority Affairs at SHU.

Before coming to SHU in 1972, the former player of the original Globetrotters, was the assistant principal of Notre Dame High School. A native of Bridgeport, he returned after his professional basketball career to familiar surroundings, not anticipating working at SHU. "I had degrees in administration and education and wanted to try something else (other than the high school level)," says Clinkscales. "I wanted to try something on a higher plane." He landed at SHU in 1972.

For fifteen years, he worked in the financial aid department, "which was chal-

lenging and rewarding," he said leaning in his chair and reminiscing. Presently, the administrative position he holds was created by the university desire to "establish a better minority presence on campus," says Clinkscales. However his position does not hinder him from sharing his basketball expertise with Coach Bike, the basketball coach. "Every once in while I have to tell him how to do it," says Clinkscales, jokingly. Recently, Clinkscales held a successful golf tournament.

"I enjoy working with people. My personal assetment is to treat everybody as somebody." He continues, "therefore I don't have a problem getting along with people. When you're brought up that way, there's no need to be high and mighty."

Walking down the hallway with a ready smile on his face, it's obvious that he enjoys his job, working with people. "Basically I do three things," he said when quizzing about his current duties. "First I concern myself with all minority groups on campus: to help them grow socially, edu-

Alvin Clinkscales, in one of his many off-campus ventures, speaks with tutors at the Florence Blackham School in Bridgeport.

Photo by Brendan Walsh

cationally, and culturally." Then Clinkscales acts liason between the university community. The tutoring program at Blackman school is one result of his

efforts in this area. "Thirdly, I'm available as advisory for the Spanish and African-American clubs on campus," he says.

Al Clinkscales is a man with a purpose at SHU. His

humorous personality and his caring attitude make him stand far above his height of 6'5".

Do sex kittens rule?

By Chris Nicholson

Some people categorize women into two groups. The college-educated, career-oriented women, and according to Cosmopolitan magazine, the "gum-chewing, bubble-headed, shiny-spandex queens."

Traditionally men are expected to date smart, educated women. But Melina Gerosa of Cosmo believes more and more men are dumping their educated girlfriends in favor of these bimbo sex kittens.

"What's the point of trying so hard in my job, in a relationship, in anything, when it all can come second to a hard body in a leopard-skin leopard?" asks Gerosa.

Some women at Sacred Heart believe it's merely a

matter of preference. Sophomore Kim Slavin explains, "If a guy prefers something that's not me, then that's what he prefers, and there's nothing I can do about it."

Why does the bimbo trap work? "The men that do it want only one thing," says Slavin, "and those women will give it to them because they're too stupid not to."

This idea backs the theory of the guys-want-sex, women-want-commitment phenomenon. "Guys basically want sex, and women basically want a commitment," said Junior J. Broad. "Some women will give the sex because they think it's the only way to get the commitment."

One man who was asked about his preference between blond bimbos and college-educated women said, "I like blond educated bimbos."

If Cosmo's definition

holds, then they do exist at SHU. One need not roam the hallways long before spying a woman wearing spandex so tight it looks like painted on pants. But they're not bimbos unless they chew gum and are "bubble-headed" too.

Sophomore Ruth Doyle believes men really prefer educated women. "If I were a guy, I'd prefer someone with a brain," she said.

Sophomore Tom Toner said, "Bimbos piss me off. I watched Back to the Future with one and spent the whole night having to explain it to her."

"I prefer educated women," said Senior Rob Kovacs. "I want someone who can handle an intellectual conversation. I don't want to go out to dinner with someone who can only say 'Oo, oo, oo.'"

Bubble Mania Strikes

By Liz DeMoura

It's new, it's creative, it's silly and fun. And now it's here at Sacred Heart! Fashion accessories with a twist. We've gone through lockets, amulets and crystals. What could possibly follow that?

No, it's not soap on a rope. It's bubbles on a cord! This new fashion style is invading SHU students' necks.

"They're fun!" says wearer Coleen Carroll. "I love using mine. It's nice to act silly every once in a while. It's a great tension releaser."

Tiny flasks of soapy liquid. Suspended around your neck, or anywhere you want, by a cord.

Some are made of simple plastic. Others out of glass. Some can even be found to be set in semi-precious stones.

Most are modestly priced at \$3.99, while others can go as high as \$100. You can find them at such stores as Stuarts, J. Silver and Hallmark's in the Trumbull Mall.

Not everyone feels the bubble mania is so terrific.

Donna DosSantos says, "They're corny and immature. They're just another item for someone to make a fast buck."

Defenders of the accessories point out that they are refillable, so you can keep on using them. "Depending on whatever color you've chosen to refill it, it can look like a whole new necklace," says Coleen Carroll.

And just how do guys feel about them? "They're a fun new fad," says Dave Coppola. "I like them because I like fun toys like that." Jim Rosa claims to never have seen one yet, so he has no reason to dislike them. "They sound interesting. Like something different from anything else around," says Rosa.

Bubble necklaces are a link between ordinary people and the stars. Tina Turner, Madonna, and Maria Shriver already sport their own.

Bubble necklaces are fun ways of returning to your childhood and forgetting the everyday worries for a short period of time, without hurting anyone.

ATTENTION ALL STUDENTS

Have you been thinking about the Spring Semester? Pre-registration is almost here and we want to tell you about a new course being offered:

DRUGS: USES AND ABUSES IN CONTEMPORARY LIFESTYLES

This three-credit course is designed as an introductory survey course and there are no prerequisites for it. It will be team-taught, can fulfill a Core 2B elective, and will be crossed-listed as PS 120 and SW 120.

Drugs: Uses and Abuses in Contemporary Lifestyles is designed to focus on the issues of substance abuse from a broad variety of perspectives. The interdisciplinary nature of this course is among its highest virtues, as well as its timeliness and appropriateness. This course promises to be exhilarating as well as useful.

HELP WANTED

Aggressive, entrepreneurial student needed to market innovative, socially conscious product. Excellent income opportunity. Call Keith at 372-1131.

PROMISES MADE

*The following candidates won in state and district elections.
Will the 1990 winners keep their promises?*

GOVERNOR:
Lowell P. Weicker, Jr.
A Connecticut Party

Promised to:
Eliminate the corporate surtax and utility tax. Tackle economic revitalization of Connecticut to spur jobs in regions beset with high social costs. Make education a priority. Expand the reach of community health centers and prenatal care.

STATE HOUSE REPRESENTATIVE:
John Metsopoulos
Republican Party

Promised to:
Oppose a state income tax. Save half billion dollars without negatively impacting crime and drug abuse, senior citizens, education and environmental programs. Form a coalition of Connecticut, New York, New Jersey and Rhode Island to jointly fund a program to clean up Long Island Sound. Adopt a tri-state approach to reduce acid rain and remove dioxins from the atmosphere. Expand the college savings plan and drug education programs. Legislate to suspend driver's license of drug users and seek death penalty for drug king pins.

CONGRESSMAN:
Christopher Shays
Republican Party

Promised to:
Vote for tax increases only when coupled with spending reductions. Vote to cut spending and reduce federal budget deficits. Support legislation which promotes recycling and taxes non-recyclable goods to pay the cost of disposal. Promote waste reduction. Increase energy tax to promote conservation and provide funds to develop alternative fuel sources and energy-saving technology. Give tax credits to users of renewable energy sources like solar energy. Support legislation requiring higher gas mileage for cars.

STATE HOUSE REPRESENTATIVE:
Elinor F. Wilber
Republican Party

Promised to:
Reduce the number of state employees and to increase productivity. Persuade federal government to limit vehicle emissions from other states. Begin testing for diesel truck emissions and control fumes from gasoline pumps. Improve storm water-sewer systems. Increase affordable housing state-wide. Improve our prison system so that only dangerous criminals go to jail and others go to work campus.

STATE SENATOR:
Fred H. Lovegrove, Jr.
Republican/Independent Party

Promised to:
Eliminate non-essential programs in order to deal with a billion dollar state budget deficit. Stop the average annual 11.1 percent state expenditure and return the state to a normal budget within three to five years. Seek legislation to lower capital gains, dividends and interest taxes. Make New York pay its share of the cost of cleaning up Long Island Sound, even if means taking them to court.

STATE HOUSE REPRESENTATIVE:
Daniel F. Caruso
Republican Party

Promised to:
Oppose all new taxes. Support a budget freeze and a reduction in non-essential expenditures (excluding education, environmental, crime and drug, and senior citizen programs). Reduce the number of consultants and all pork-barrel projects.

The controversy over using animals for medical research

"The greatness of a nation and its moral progress can be judged by the way it's animals are treated."

If Mahatma Ghandi's words are true, then America is in a sorry state. Every year, 8-10 million unadopted cats and dogs are either abandoned or impounded. Those who are abandoned usually meet death from starvation, automobile accidents, or disease. Among those that find their way into an animal shelter, less than 15 percent are reclaimed by their owners or adopted; the rest are destroyed or turned over to animal research laboratories. Veterinarian Michael W. Fox calls the current state of affairs the "holocaust of the animal kingdom."

Animals in the Laboratory

The issue of using animals for medical research is very controversial, with stories of violence and cruelty revealed to the public every year. Among the experiments are: studies of head trauma where the skulls of cats and monkeys are fractured, and after the observations these animals are tossed into a pile, not necessarily dead. Animals are force-fed drugs to cause addictions so their withdrawal symptoms can be documented; others are given disease-causing injections for the purpose of testing the effectiveness of various medications. Dogs and cats are shot by high-power shotguns to demonstrate the effect of weapons for the military; the military also tests biological and chemical weapons on animals.

Other animals are used for educational purposes. Frogs and minks that are used in high school dissections are only the tip of the iceberg. Medical and veterinary students perform unnecessary surgical procedures on living animals that have been sold to them either by an animal shelter or one of the pet "rustlers" that seize pets and use them for profit. Nursing students are taught how to intubate by inserting breathing tubes into kittens rather than model infants. Every year, 25-35 million animals — dogs, cats, monkeys, rabbits, guinea pigs, birds, and rodents are killed for purposes of research or education.

The very validity of these experiments is questionable. They are given in an artificial environment, with no exposure to the elements that may play a role in the development of disease such as air pollution and radioactive

materials. Many of the animals, having been abandoned, are already weak and sick, and are more susceptible to negative stimuli than the average human. The carcinogens that "have found to cause cancer in laboratory animals" are given to those animals in concentrations which are virtually impossible for humans to use. Finally, there is the fact that what cause disease in animals is not necessarily dangerous to people, and substances that are dangerous to humans do not have a negative effect on animals. Dr. Herbert Gundersheimer of the Physicians Committee for Responsible Medicine admits that "Results of animal tests are not transferable between species, and therefore

have stopped testing their eye makeup on animals. Several years ago, after a demonstration outside the corporate office by people in rabbit suits, Revlon followed suit.

Cosmetics are by no means the only products that are used. The LD50 test judges the potential toxicity of everything from laundry detergent to furniture polish. Groups of animals are force-fed the substance being tested until fifty percent of them die from poisoning. The fifty percent that survive the experiment are either destroyed or used in another LD50. The purpose of this test is to determine what would constitute a lethal dose of the product.

The Animal Welfare Act of 1966 was intended to set minimum standards of care for animals in the

Medical researchers call this "necessary suffering," while on the other side of the fence animal activists claim that virtually none of this research will benefit the human race.

cannot guarantee product safety for humans."

In addition to animals used for medical purposes, 14 million animals die each year from product-testing of everything from toilet bowl cleaners to eyeliner. These tests are not always necessary. One of the most publicized produce tests is the Draize Test. This test involves dripping potentially harmful substances into a rabbit's eyes and seeing if it causes irritation. The animal's eyes are often forced open so they cannot blink to wash the substance away. Luckily, many companies have abandoned the Draize test. Avon, Estee Lauder, and Aveda are among those who

laboratories and mandate regular evaluations by the USDA. The law was updated in 1985, but it remains difficult to enforce, because researchers can appeal to the law with "special circumstances." The AWA did not originally apply to the birds, mice, and rats that make up a large percentage of research animals. The Humane Society filed against the USDA, which grudgingly agreed to its demands. Dr. Martin Stephens of the HSUS said "It's regrettable that an agency of the federal government has to be sued to carry out the law."

There are alternatives to animal testing. Irritants can be patch-tested on humans with minimal negative effects; for surgical education, models can be used. And, with a high-state technology, even the LD50 test can be simulated with a computer program. One of the goals of the HSUS and other animal-rights groups is to improve the living conditions of research animals. Among the changes proposed are larger cages, exercise, interaction with other animals and humans, and mandatory use of anesthesia and pain relievers. The ultimate goal is minimal animal testing, with the condition that those animals which are destroyed are put to death by the least painful method possible, not the least expensive.

Animals as an Industry

The most publicized attack on the exploitation of animals for profit is that of the fur industry. Each year, 17 million animals are trapped and killed to make fur coats, jackets, and accessories. Animals are usually trapped with painful leg-hold traps, which keeps the animal trapped and in pain for an average of fifteen hours before the hunter comes back and kills it. Some animals chew through their own limbs to free themselves from the snare; these usually bleed to

death or are killed by infection.

This is one area that is showing progress. Many fashion designers are now using faux fur in their fashions; these include Bill Blass, Norma Kamali, and Giorgio Armani. Harrod's of London has closed its fur salon, and other department stores are following suit. Large numbers of celebrities have publicly vowed to not wear fur. Actress Rue McLanahan puts it succinctly: "Fur used to turn heads, now it turns stomachs."

The condition of animals raised for produce are grim. Most of them are kept in dark, crowded barns with closed-in pens. They are pumped full of steroids and antibiotics to promote muscle growth. 20 percent of hens raised for slaughter die in captivity. Those who are used for egg-laying are given hormones so they will continually produce eggs; the same is true for dairy cows, which normally only produce milk when they have calves to feed. One in ten of the calves raised for veal die within the slaughterhouse.

How You Can Help

1) **Use the power of the pen.** Stop using products that are tested on animals, and write to the company telling them that you are no longer using their products, and why. The corporations that are considered the most at fault are L'Oreal, Gillette, Johnson and Johnson, Chesebrough-Ponds, and Clairol, Inc. Write to the editors of local newspapers and magazines. Since animal testing is a politically relevant issue, write to congressmen. Many of the humane societies and animal shelters include postage-paid cards addressed to Congress expressing support for animal-protecting legislation. It's not necessary to spend money to support these groups; a signature is all it takes. To obtain a "cruelty-free" shopping guide, contact PETA. An address follows in the

resources, as well as the proper way to contact elected officials.

2) **Spay and neuter your animals.** Three to five thousand puppies and kittens are born each hour in the United States. This population explosion causes a situation of homelessness that is just as disturbing as human homelessness. For every cat in a proper home, there are twelve that are on the streets. Most animal shelters and animal rights groups offer free or low-cost spaying and neutering.

3) **If you want a pet, stay away from pet shops.** In the 3,500 animal shelters in the country, there is a pet for everyone, and by adopting from one of these you can save an animal's life and improve your own. The Humane Society of the United States discourages giving animals as gifts; even if the recipient does love animals, not everyone wants to take responsibility for their own pet.

Declaration of the Rights of Animals

Whereas it is self-evident

That we share the earth with other creatures, great and small

That many of these animals experience pleasure and pain

That these animals deserve our just treatment and

That these animals are unable to speak for themselves

We do therefore declare that these animals

Have the right to live free from human exploitation, whether in the name of science or sport, exhibition or service, food or fashion

Have the right to live in harmony with their nature rather than according to human desires

Have the right to live on a healthy planet

THIS WEEK SHU offers

15: Freshmen Elections
• Center for Policy Issues Speaker Series continues with Joseph McGee, vice president of People's Bank will speak on "Intergovernmental Issues" in community room at 11:00 a.m.

• Career Luncheon Series continues with G.E. Capital, "Business-to-Business Financial Services" in Chubby's Lounge at noon

16: Women's Basketball vs. King in SHU-BOX at 7 p.m.

17: Media Studies Dept. presents "Star Wars" in widescreen cinemascope in the studio at 7:30 p.m. Admission is free.

19: Act Faculty Workshop on "Mentoring" in faculty lounge at 3 p.m.

20: International Students Club Food Fair in Chubby's Lounge

• Women's Basketball vs. Quinnipiac in SHUBOX, 6 p.m.

• Men's Basketball vs. Quinnipiac in SHUBOX, 8 p.m.

LIFE IN HELL EXPLAINED

A BRIEF INTRODUCTION TO THIS CARTOON FOR NEOPHYTES AND A QUICK REMEDIAL COURSE FOR THOSE WHO HAVEN'T BEEN PAYING ATTENTION

WHAT IS "LIFE IN HELL"?

"LIFE IN HELL" IS A CRUDE LITTLE COMIC STRIP FULL OF ALIENATION, ANGST, FEAR, AND GRIEF.

WHAT ARE THE MAJOR THEMES OF THIS CARTOON?

LOVE, SEX, WORK, DEATH, DOOM, AND RABBITS.

HOW THE HELL DO YOU PRONOUNCE THE CARTOONIST'S NAME?

mät grā'ning
also grō'ning grō'ning grō'ning grō'ning I HAVE GIVEN UP.

DRAMATIS PERSONAE

PLEASE ALLOW ME TO APOLOGIZE IN ADVANCE.

THERE ARE SO FEW RULES OF DEPTH FOR WOMEN IN TODAY'S COMIC STRIPS.

NICE FEZ. SAME TO YOU AND MORE OF IT

GO AHEAD, STARE AT MY EAR. I KNOW YOU CAN'T HELP IT.

BINKY
WHO: THE STAR.
DISTINGUISHING FEATURES: TWO GROTESQUE EARS, BUGGY EYES, TWITCHING.
EMOTIONAL STATE: BITTER, DEPRESSED, NOBUN.

SHEBA
WHO: RABBIT ON THE GO.
DISTINGUISHING FEATURES: BASICALLY, BINKY IN DRAG.
EMOTIONAL STATE: GENERALLY MIFFED, OCCASIONALLY STEAMED.

AKBAR & JEFF
WHO: BROTHERS, OR LOVERS, OR BOTH.
DISTINGUISHING FEATURES: FEZZES, BIG NOSES, BOTH EYES ON SAME SIDE OF HEAD.
EMOTIONAL STATE: INSCRUTABLE.

BONGO
WHO: BINKY'S ILLEGITIMATE SON.
DISTINGUISHING FEATURES: TAKE A GUESS.
EMOTIONAL STATE: SQUELCHED.

LIFE IN HELL FUN FACTS BINKIES IN HISTORY

IN WILLIAM MAKEPEACE THACKERAY'S NOVEL VANITY FAIR, THERE'S A MINOR CHARACTER NAMED LORD BINKIE.
IN RUOYARD KIPLING'S NOVEL THE LIGHT THAT FAILED, THERE'S A DOG NAMED BINKY.
UNTIL HE WAS 8 YEARS OLD, SYLVESTER STALLONE WAS CALLED BINKY.
JUSTIN GREEN CREATED THE CLASSIC UNDERGROUND COMIX CHARACTER BINKY BROWN.
THERE'S A RESTAURANT ON SUNSET BOULEVARD IN LOS ANGELES CALLED BINKY.
THE ORIGINAL TWO-PIECE SWIM SUIT WAS CALLED THE BINKY.

IS BINKY KNOWN IN OTHER LANDS?

YES, BUT BY MANY DIFFERENT NAMES. IN MEXICO, THE CHILDREN CALL HIM EL BINKO. IN GREECE, HE IS BINKENTIOS. IN INDIA, HE IS KNOWN AS BINKINANDA. IN PARTS OF THE USA, HE IS CALLED SATAN.
PLEASE CLIP AND SAVE THIS FEATURE. THE LABYRINTHINE COMPLEXITIES OF THIS CARTOON WILL NEVER BE EXPLAINED ADEQUATELY AGAIN.

WHAT DO BINKY AND BONGO DO ALL DAY?

THIS IS BINKY AT HIS JOB.
THIS IS BONGO AT HIS SCHOOL.
TOGETHER AND APART, THEY HAVE MANY TRILLS AND SPILLS.

WILL THE CHARACTERS IN "LIFE IN HELL" EVER ACHIEVE TRUE HAPPINESS?

WHAT A SILLY QUESTION! AT THIS VERY MOMENT, THEY ARE AS HAPPY AS YOU ARE!!

ARE YOU SICK OF RESEARCH PAPERS? DO YOU FIND IT HARD TO THINK OF IMPRESSIVE TECHNICAL JARGON AT 3:00AM? HERE'S SOME CATCHY PHRASES YOU CAN USE, DON'T EVEN LIST THEM IN YOUR BIBLIOGRAPHY!

"PORCELAIN NEUROTHESIA" THIS IS WHEN YOUR LEGS FALL ASLEEP WHILE SITTING ON THE TOILET.

WOW...THERE'S A WORD FOR THAT?

"E.O.M. CONFLICT PARADIGM" THIS IS WHEN YOU CAN'T DECIDE WHETHER TO BUY BEER OR PAY RENT AT THE END OF THE MONTH

"PROFECENTRIC HONING" THIS IS THE UNCOMFORTABLE SENSATION EXPERIENCED BY A STUDENT WHEN THEY FEEL A GRADE RECEIVED FROM AN EGO CENTRIC PROFESSOR IS BASED ON ATTITUDE, NOT APTITUDE.

The Greeks: In the Beginning

An entertaining history lesson

By Koleen Kaffan
A&E Writer

Rarely is a lesson in history entertaining but **The Greeks: The Beginning** is just that. The eight scene play directed by Claude McNeal dove into many of the mythological characters that the people of ancient Greece believed in. Much of the emphasis laid on the arts and literature of this time period. The characters are played by the Humanities Touring Group out of Branford, Connecticut and consists of many professional actors and actresses. Included in the cast are SHU's Greg Haberny and Elisa Trisancho, both actors-in-training.

In the first scene the God and the Goddess are introduced as pictures of them and what they symbolize appear on screens both surrounding and on the stage. Each character is shown through his or her shadow and they are described by the narration of SHU professor Ralph Corrigan.

Scene two begins a journey into the writer Homer and his works,

The Odyssey and *The Iliad*. Both are reenacted and at the same time linked together, as the books were meant to be. Each act of these tales are performed as the author sits to the side of the stage narrating.

The next story goes on to tell the tragedy of the Sophocles' story *Oedipus Rex*. A king must search for the truth in himself and is then forced to make the realization that he must surrender his pride.

Scene three is vital for the structure of the play. Much of the Ancient Greeks lives were based on the philosophy and the awakening of answers to some of their questions. The death of Socrates portrayed by Dana Sachs, was the basis for the scenes theme. After his death there is a struggle between the strong character of Apollo (Paul Perille) and the comical Dionysus (James Michael Nolan). Both have their own idea of what is important in the life of the Greeks, brains or brawn.

The following scene leads the way for the next three as Apollo and Dionysus go in to the works of Sappho. In this scene the lyrical poet is interpreted by her son por-

trayed by dancer Wesley Lawrence and the Goddess she wrote for Aphrodite played by Leslie Bernardini.

As the story continues the leader Pericles is studied and the political aspects of Greece are reviewed. On the line of politics the next story, Aristophanes' *Lysistrata* is portrayed. In this scene the women of Greece ban together to try to put and end to war by abstaining from their husbands forcing them to create peace.

In the final scene of the play, Dr. Corrigan's narration once again begins and slides show the relationship of Ancient Greece and the modern world such as the Olympics, architecture and even a movie still from *Animal House* of John Belushi in a toga.

The Humanities Touring Group is successful in bringing a comedic and dramatic approach to the history of Ancient Greece. On April 7-11th they will be back with a production called *The Renaissance Era: Europe Awakens* at Sacred Heart University. For information or reservations call 365-7600.

Time's not up for Living Color

By Paul Molnar

It seems that Living Color has broken well into the mainstream. Their debut album "Vivid" and a highly successful tour with the Rolling Stones has helped them carve an entrance into the popular music market. 1990 has more of the same in mind for the band.

The new album "Time's Up" will live up to the anticipations of many of their fans, but maybe this one has to grow on you a little before you totally love it. Because it carries so much sound from the first album it is hard for the new one to strike any interest. Don't worry, this one will still deliver the metal/funk sound that they have become famous for.

Vernon Reid, guitarist for the band must have had a field day in the studio. You can hear the remnants of Jimi Hendrix in the late 60's and the distortion of Page and Beck in the 70's. Vernon and the band do go out on a limb and tend to get unusual sometimes. The title track "Time's Up" begins with an extremely realistic sample of a grandfather clock alarming at the new hour. Also, songs like "Elvis is Dead" get a little silly trying to point out what the purpose is of all of the Presley hype. Besides that

the rest of it is exciting and all of the lyrics are thought provoking.

It's so difficult for bands to stay fresh with the changing times. Ever since this band made their debut they have been in the spotlight. I tell that this effort isn't as well thought out as "Vivid," but it is still excellently written, produced, and performed music. Ed Stasium, who produced both of the bands' albums has an incredible talent of bringing out their best. The musicians help as well. William Calhoun and Muzz Skillings provide a superb rhythm section and Corey Glover adds more fire with his vocals. The raw energy really shines on "Type," the first single from the album. It has been plastered all over MTV and gives you a good idea what's on the album.

In short, Living Color did not duplicate their first album in the least. That would have been boring. Instead, "Time's Up" has the sound and the groove with a new twist. I think they are going to be around for a while because they dare to be different. If you can try to catch them live when they are in the area because they are red hot! This one is worth the \$16 or so on CD and will surely find a place in your collection. Check it out.

Pegasus: Local band in demand

By Paul Molnar

If you've been around the area clubs lately, you've probably been exposed to some of the local bands that have been playing out. If Bridgeport is your stomping ground then more than likely you have either seen or heard of Pegasus, an original rock quartet that have been making strides. You might have seen them on campus since three of the four members are Sacred Heart students. This band has been trying to find the right combination for some time, but just recently worked out most of their problems: mainly vocals. Now the future looks bright with a new singer and a new attitude.

The main character in the band is Frank Ventresca, keyboard player and songwriter. He and guitarist Vince Bossio have been playing together since grammar school and are responsible for the formation of the band. Frank's younger brother Tony, who plays drums, has been with the others since the early 80's. At this time they started hiring themselves out as a wedding band. They had some rough times as well. A former band member, who played drums while Tony worked on saxophone, didn't quite work out and the guys couldn't get anything started. Now their determination and talent is

beginning to establish a positive reputation for themselves.

Recently, the band went through intense auditioning for a new vocalist and after several weeks they found Bill McKiernan. His involvement in the band has the guys primed for the nightclubs. This positive attitude does help, but it only goes so far. Excellent musicianship carries the band the rest of the way. Frank and Tony played for several years in competitions. Tony, who is 19, has been playing since age 6 and has more talent than some professional drummers and Frank is a very talented player and song writer as well.

The mix of good music and determination is the band's secret. I had asked Frank where his "new" band is headed these days. He replied, "Well I'm told we don't follow tradition because for one we don't have an electric bass player. (He handles the bass lines on a separate keyboard). I don't care because it's not cheesy, it's real rock-n-roll. I'm positive of the outcome." I also asked Bill what was so special about the band. He said "Out of all of the other bands that I have played with, these guys are the best musicians."

It seems that Pegasus has everything on track these days. You can expect a new demo tape,

Pegasus jamming live at the Club Tip Toe (left to right) Frank Ventresca, Bill McKiernan, Tony Ventresca, and Vince Bossio.

probably at the end of February. Then they will continue their invasion of the clubs. Hey, don't take my word for it, you can catch Pegasus at the Club tip Toe on Wood Avenue in Bridgeport on Nov. 16. This will be their last area appearance before the recording break so check it out!

Chamber Orchestra Plans Concert

By Frank Mastroianni

The music of Handel, Haydn, Bergsma and Bach will resound through the halls of Sacred Heart University.

On Dec. 2 at 3:00 p.m. in the university's Hawley Lounge, the Sacred Heart University Community Chamber Orchestra will be performing under the direction of Professor Leland Roberts, as part of an on-going concert series.

The orchestra, founded 21 years ago, performs one concert each semester during the school year, then hits the road for two more shows in one of the area's outlying towns.

The Community Chamber Orchestra lists some SHU students among its members, but is primarily made up of musicians outside of the Sacred Heart community. "Without the presence of non-students there could not be an orchestra," said Roberts, who added that "having outside members is important for the few students who do want to participate."

Nicollette Thane, a SHU student in the group said, "Mr. Roberts is an excellent conductor." Her only regret is that she wishes more students would participate. "It really is an excellent program," she added.

According to Roberts, playing for the SHU orchestra entitles a student to one college credit. He added Roberts is doing "a wonderful job for community music in general."

At the December concert, Marvin Zimmer, a resident of Trumbull, will perform the concerto by C.P.E. Bach, son of Johann, as an oboe soloist. This will be followed by the orchestra's performance of Haydn's Symphony No. 83. The program will conclude with Bergsma's transcription of dances from a New England album of 1856.

Apple introduces the Macintosh Classic.

Trying to stretch dollars when you're computer shopping doesn't mean you're willing to make sacrifices.

That's why you should consider the new, affordable Macintosh® Classic® computer. It has everything you need—including a monitor, keyboard, mouse, 2 megabytes of RAM, and a 40-megabyte hard disk. Just plug everything in and the Macintosh Classic is ready to run, because the system software is already installed.* And, thanks to the Macintosh computer's legendary ease of use, you'll be up and running in no time.

Like every Macintosh, the Classic can run thousands of available applications that all work in the same, consistent way—so once you've learned one program, you're well on your way to learning them all. And this is one cheap roommate that doesn't have trouble sharing. The Apple® SuperDrive™—standard equipment with every Macintosh—reads from and writes to Macintosh, MS-DOS, OS/2, and Apple II floppy disks, which means you can share information with someone who uses a different type of computer.

See the Macintosh Classic for yourself. It'll change your mind about cheap roommates.

For further information visit the
Computer Center located in
Vax Lab or call 371-7796

The power to be your best.™

* Macintosh Classic computers purchased before January 1991 include system software on floppy disks; software is not installed.

Baseball Completes Season 12-11

By Rick Ferris
Sports Editor

After completing their fall season with a 12-11 record, the Sacred Heart Baseball team now turns their attention towards the spring season.

On the whole, the fall season was disappointing for the Pioneers. Giaquinto commented, "I was disappointed in our performance, I think we're a better team than (what) we showed. We have to work very hard in the offseason and preseason if we want to attain our lofty goals." The goal the team set was to earn a regional bid this spring and hopefully advance to the World Series.

There were, however, individual good performances during the fall season. Giaquinto stated "Don Romeo, Scott Schilling, and Al Carrara hit the ball well, and Jose Mendez and Pat Scavone hit the ball well for the freshmen. The pitching was also pretty good." Romeo led the team with a .415 batting average, and tied for the

team lead in doubles with four, Scott Appleby also had four two-baggers. Schilling led the team with two home runs, and added eight runs batted in with a .395 batting average, while Carrara had an even 400 batting average. Mendez and Scavone hit .327 and .324 respectively.

Leading the way for the pitchers were Senior co-captain Rich Licursi who sported a 3-1 record with a 2.12 era. Licursi also had .32 strikeouts in 29 2/3 innings pitched. Also turning in a solid fall season was Junior Tim Ward. Ward had a 2-2 record with a solid 2.17 era. A foursome of freshman hurlers also had solid fall seasons. Jon Goode had a 1-0 record with a 1.69 era in 16 IP, Mike Lumley had a 2-1 record with one save with a 0.00 era in 11 IP, Joe Zanchetti also had a 2-1 record with one save with a 0.62 era in 11 2/2 IP and Al D'Amato had a 1-0 record with a 1.00 era in 9 IP. The team era was an impressive 2.89.

Missives from the Madman

My fellow Met fans, we must now face the future; a future without the superhero that has roamed the right field territory for the Mets for the last eight years. Darryl Strawberry is a Dodger now, and with the expected return of Orel Hershisser, the reign of the Cincinnati Reds in the national league west may be a very brief one. As for the Mets and their fans, the Strawberry charade is over. He's gone; don't dwell on it. Sure it was a terrible mistake by Frank Cushen, then Jay Horowitz and Al Harazin not to make the greatest possible effort to keep 'Straw, and true the Mets by letting Straw go via free agency received nothing for him (oops, sorry a first round draft pick) which was the biggest mistake, but the future must be dealt with. The Mets do have the best pitching staff in all of baseball, now they must find a way to produce for them. The Mets are

in dire need of a leadoff hitter, so the pursuit of Vince Coleman or Brett Butler may not be a bad idea. I have also heard some rumors of a pursuit of the Kansas City Bo. The Mets front office must remain busy this offseason or face the problem their New York basketball counterpart currently faces.

Yes, the Knicks do face a dilemma. Because they stood pat and felt a healthy Kiki Vandervedge was the answer, Boston and Philly went out and improved themselves. The Knicks did not. Third place may be the best they can do and if Patrick Ewing goes down, look out below. Believe me, it pains me to say this, but it's true.

The Jets gave a good effort Sunday but once again came up short. The Dolphins are a better team, but were the recipients of two gifts in the game. One was a wind blown punt striking the leg of Jet

blocker James Hasty which Miami recovered at the Jet five and scored two plays later. The second gift was a horrendous, yes I do mean horrendous non-reversal of an obvious fumble by a Dolphin defender after an interception. Instant replay really blew this call and attackers of the rule will use this play as a prime example of the failed rule. What can you say

Women's con't. from pg. 16

and know that they were in a game. The ladies are really playing hard in practice. I want teams to say that they have to beat SHU."

Don't look for a running game to develop, Swanson stated. "We're going to run when we can run, we are going to have to stay out of foul trouble and make shots. We are going to have to play defense and be a good rebounding team. It will be a mix of run and controlled

about the Giants other than the fact that they just keep on rolling along. They do what is necessary to win and week thirteen the next step will arrive for the 'Gints. To me there are four premier teams in the NFL right now and they are the Giants, 49ers, Bears, and the Buffalo Bills with the Dolphins falling a half notch behind.

offense. Defense is the key, if we play defense, we will have a chance at winning. I hope we play hard, and hopefully the ball will go in the basket. We'll just let the chips fall where they may."

The Lady Pioneers open their 1990-91 campaign tomorrow night in the SHU Box against the King's College at 7 p.m. So come out and cheer on the team.

Cagers con't. from pg. 16

McLeod and Ed Swanson) asked him to do many different things, but the good things we've seen from him have justified our expectations." Coleman admits, "I'm not making any promises, but I'll try my best."

Bike is pleased with the newcomers. He sees a sense of respect toward the freshmen and Burke by the veterans. 6-4 guard-forward Theo Gadsen, who has shown an impressive dunking ability, was an All-New York City player at Brandeis High School. 6-4 guard forward Rob "Robo" Vaughn, whose high arching shot somewhat resembles that of Sean Williams, had a good season last year at St. Thomas More Prep. in Pennsylvania. 6-7 forward-center

Damon Ferguson will be called on to help Dubose in the center position. Ferguson improved his game at Maine Central Institute last year.

As for Bike's outlook for this season, he feels that there is definite room for improvement. "At our level, we can't be satisfied by saying we're going to be good — we have to be good," he stresses. The Pioneers are in a tough, competitive league. In Bike's opinion, every team in the NECC will be a challenge, especially UB.

The players seem optimistic about this season. Todd Williams states, "We've got a good team, but we still need improvement in certain areas, such as defense."

Phillips adds, "I think we're

really going to do well if everyone stays healthy and keeps up the hard work."

Vaughn is eager to play for the Pioneers. Practice has been hard, but if everyone works together and takes it seriously, we should be on top," he states.

During a recent practice, Bike asked the team to rate their performance. "They gave themselves a C+, and I agree. I think it should be higher, but the important thing is that we're improving. But is that good enough for where we want to go? No."

The Pioneers open the 1990-1991 season tomorrow night at 7:30 against the College of St. Rose in Albany, New York.

Sports Briefs

The Posers defeated Damage, Inc. by a score of 16-0 in Sunday's Intramural Football Championship game. The Posers scored on first half touchdown passes from Jerry Fry to Rich Licursi and Al Carrara. The Posers were so dominant that they didn't allow a Damage, Inc. first down until late in the second half. Poser Pete Yarasavich stated afterwards, "they only had about two first downs. They couldn't do anything against us. We marched right down the field and scored on short passes."

The Men's Soccer team was defeated in the first round of the ECAC tournament last Friday by a score of 7-1 to C.W. Post. Senior Daniel Dos Santos scored the lone Pioneer tally for his 34th goal of the season. The Pioneers finished the season with a 14-6 record and finished number 18 in the nations. Congratulations go to NECC Coach of the Year Joe McGuigan and the whole team for an excellent season.

Cagers strive for winning touch

By Amy Madison

With one national title and seven regional titles under its belt, right now the Sacred Heart Men's Basketball team just looks to improve on last year's mediocre 15-14 (5-9 NECC) record, but it's a long way to the top. Head Coach Dave Bike and the Pioneers will take it one game at a time.

The team is already starting with several strikes against it. Sophomore guard Darrin Robinson, who earned Rookie of the Year honors and led the Pioneers with 22.7 points per game last year, is academically ineligible for the first semester. The team will also be without guard Rodney Smith, a former Pioneer in the 87-88 and 88-89 seasons, who was asked to leave the team after illegally participating in a summer league game.

Perhaps the biggest problem facing the team this season is injuries. Junior guard-forward Phil Howard is "out indefinitely with a groin sprain," according to trainer Mike Weild. 6-7 sophomore forward Will Burke, a transfer from St. Francis of Pennsylvania, has a stressed crossover ligament in his right knee and will undergo rehabilitation with Weild. He should return soon.

Sophomore guard Lincoln Boulanger (4.0 ppg) has missed several recent practices with an infected toe and missed some practices earlier after undergoing arthroscopic knee surgery.

Despite the problems, Bike expects to see a strong performance from his eight returning lettermen. On top of the list is senior Todd Williams, who averaged 19.4 ppg and 7.4 rpg last year and earned first team NECC and NABC All-District honors, ECAC second team honors, and NABC honorable mention All-America. Despite undergoing arthroscopic surgery mid-season Williams returned eight days later with a 35-point, 18-rebound effort against St. Rose to capture the MVP in the annual SHU Holiday Classic.

Bike also expects to see improvement from seniors Rob Dubose, Milton Pettway, and Kevin Phillips. Center Dubose averaged 6.4 ppg and led the team in rebounds in eight games last season, and has improved in his offensive ability. Guard Pettway helped the team with 109 assists; 5.5 ppg, and strong defensive ability. Guard-forward Phillips, a transfer from WestConn who became eligible in the second semester, averaged 6.7 ppg and earned All-Tournament honors in the Holiday Classic.

Also returning is sophomore Lionel Coleman, who averaged 3.5 ppg in his freshman year. Coleman, a natural forward has been working in the backcourt lately, due to the shortage of guards. Bike commented, "Lionel has shown good potential, and we've (Bike and assistant coaches Barry

See Cagers pg. 16

With Milt Pettway in pursuit, Lionel Coleman dribbles outside as the men's basketball team prepares for its season opener at the College of St. Rose in Albany, N.Y. on Friday, Nov. 16. Seats are still available for this away trip. Contact the Activities Office to reserve your seat and support our team.

Women's basketball team optimistic

By Rick Ferris
Sports Editor

The Women's Basketball team enters the new 1990-91 basketball season with a new coach and a new set of hopes. First year Coach Ed Swanson along with assistant Terry Stahl hope to turn around a team which is coming off a disappointing 4-21 record (1-13 NECC).

The team has reason for optimism as all five starters from last year's team return as does Junior Jennifer Dankulich who was the first player off the bench last year. In addition to the returnees is a group of newcomers expected to contribute immediately. The newcomers include Junior transfer Alethia Osbourne who came here from Providence College. Another transfer is Sophomore Carol Brown from Westchester Business Institute. Rounding out the newcomers are Delvia Alexander, Michele Langevin, and Julia Rembert.

Head Coach Swanson said of the players he is counting on to lead the team this year, "(Senior Captain) Diane Nicholls has proven to be a quantified quality player in the league. However we are going to have some quality people surrounding her, so she's not going to have to do it all."

Leading the list are Junior Elaine Agosti and Sophomore Kim Filia. Agosti, who averaged 11 points per game last season and 5.4 rebounds will start at forward. At the other forward position will be Sophomore Karen Bell. Bell averaged 8 rebound a game last year and 6 points per game.

Filia will start the year at guard. As freshman, Filia averaged 16.2 points per game and four rebounds per game. Also expected to start at guard is newcomer Brown.

At center is Nicholls. Nicholls led the NECC last season in points per game (23.9) and rebounds a game (8.9) and many feel that Nicholls was spurned by NECC coaches from the All-NECC team. Nicholls intends to prove the coaches wrong this season.

Swanson also stated "Dankulich, and Alexander will be key players off the bench." In addition, Tisha Johnson, a starter last season averaging five points a game, and over five assists per game, as well as Osbourne are ineligible for the fall semester and hope to rejoin the team in January. Both are practicing with the team.

Swanson is optimistic about the team this year, "I think our goals are to have any team to come in

See Women's pg. 16

Karen Bell, during Monday night's practice, runs through a "run and gun" drill. Newly hired women's basketball coach, Ed Swanson (center in background), keeps a watchful eye on the lady cagers. Come out and support them in their season opener in the SHU box on Friday, Nov. 16 at 7:00 p.m.
